Washington, D.C | 240 418 1754 | ting.lew@gmail.com | github.com/tingaloo

Skills

Javascript, React, Redux, Node, Ruby on Rails, Jest, Capybara, Jenkins, AWS

Experience

Lead Front End Developer - Dovel Technologies

Twinbrook, MD (10/2018 - Present, 07/2017 - 04/2018)

- Developed and architected the front end for Recipient Insight, a responsive dashboard to display grant data.
- Designed and maintained applications with accessibility and 508 compliance.
- Developed a React Native application with offline autosave functionality for remote workers.
- Created a component architecture using a mix of Material UI and TailwindCSS.

Software Developer - DCAF Engineering

Washington D.C (06/2015 - Present)

- Implemented autosave features to Rails forms used by DC Abortion Fund case managers.
- Fixed complex autosaving bugs and wrote Capybara integration tests.
- Spearheaded efforts to migrate to ReactJS to refactor complex jquery code.

UI Developer - OneGlobe IT

Washington, D.C (04/2018 - 09/2018)

- Assisted the redesign of a legacy grants management app into a React and Redux application.
- Worked alongside United States Design Service to convert mockups into functional pages.
- Created new pages and features and wrote Jest tests to meet the 70% code coverage minimum.

Programmer I - Tier 1 Consulting Group

Columbia MD (08/2015 -12/2016)

- Redesigned existing company website to a static React website.
- Ported D3 jquery visualizations into React Components that represent HHS healthcare data.
